SUMMARY

This is a report of forest production in Nova Scotia for the Calendar year 1986, based on data collected by the Operations Branch of the Department of Lands and Forests. Compiling, editing, publishing and distribution were done by the Program Planning Branch.

The information was collected from producers, processors and buyers of primary forest products. Sawmill firms reported the quantities sawn during the calendar year 1986, whether the wood was purchased, custom-sawn or produced by the mill owners themselves. Roundwood production was obtained from buyers and producers of pulpwood, pit-props, veneer logs and poles and piling. Pit props are included with poles and pilings for aggregation reasons.

Production data are concerned only with wood of Nova Scotia origin.

Production is shown as accurately as possible by county of origin. Resawn volumes are omitted to eliminate duplication of data.

The total commercial production, at roundwood level, amounted to 124,761,185 cu.ft. (3 532 840 m^3), solid wood equivalent, up 11% from 1985. Sawlog volume increased by 10% from 1985, amounting to 37,508,484 cu.ft. (1 062 121 m^3) equivalent. Round products increased 11% to 2 470 719 m^3 equivalent.

Production of pulp chips from sawmills decreased by 44% from 1985.

Compared to 1985, increases were reported for softwood lumber, softwood boxwood, hardwood railroad ties, hardwood mine packs, softwood and hardwood shingles, softwood and hardwood shingles, whole tree chips, softwood and hardwood pulpwood, and softwood poles & pilings and pit props. Decreases were reported for hardwood lumber and boxwood, softwood railway ties, softwood mine packs, softwood and hardwood laths, softwood and hardwood residue chips, and hardwood poles & pilings and pit props.

The pulp and paper segment of the industry is composed of five mills: a kraft pulpmill at Abercrombie Point; a sulphite pulpmill and newsprint mill at Point Tupper; a newsprint mill at Brooklyn; a paperboard mill at Hantsport and a hardboard plant at East River.

The total number of firms operating all types of sawmills remained the same at 406 from 1985 to 1986.

The number of firms producing over one million board feet during 1986 was 45, two more than in 1985. There were 305 firms producing less than one million board feet per firm, compared to 317 in 1984.

Of the smaller producers, 233 produced 100 Mfbm or less in 1986.

Firms producing over one million board feet per firm accounted for 13% of the number of firms and produced 89% of the lumber and boxwood.

As in previous years fuelwood, whether in sawmill chip form or stacked, is not reported. Since 1983 whole tree chips have been reported, however, they are for all species and all diameters and are not included in any summary figures.

SUMMARY OF PRODUCER BY TYPE OF SAWN PRODUCT

NOVA SCOTIA - 1986

	1985	1986
No. of firms producing lumber only	304	297
No. of firms producing boxwood only	4	3
No. of firms producing ties only	0	0
No. of firms producing mine packs only	0	1
No. of firms producing laths only	29	29
No. of firms producing shingles only	13	11
No. of firms producing staves & headings only	3	3
Sub Total	353	344
No. of firms producing more than one product	53	53
Total No. of Firms	406	397

See "List of Sawmill Owners and Materials Produced - 1986" for further information.

Production statistics by ownership class are included in this publication. Provincial Crown production was obtained from records kept by Department of Lands and Forests. Large Private owners provided data for private ownerships of over 1,000 acres (400 ha) per owner. Small Private ownership production was estimated by subtraction of Crown and Large Private production from the total provided by sawmill and roundwood producers.
